

Atty Docket No.: JCLA6623-R

Serial No.: 09/849,457

AMENDMENTS**In The Specification:**

Please amend paragraph [0036] as follows:

[0036] Further still, FIG. 4 is a cross-sectional drawing, schematically illustrating a packaging structure of an LED, according to another preferred embodiment of the invention. In FIG. 4, a covering layer 70 can be like the covering layer 62 in FIG. 3B, or alternatively a covering layer 70 is not necessary to have the active absorption layer. However, before the sealant layer 60 is formed, an active absorption layer 64 is evaporated beforehand to at least cover the metal cathode layer 56. The active absorption layer 64 may also cover the other portions, such as the transparent anode layer 52 and the LED material layer 54.
